

BigBag Washing Line

Reference line: Romania, approx. 500 kg/h input capacity

Input: Contaminated BigBags

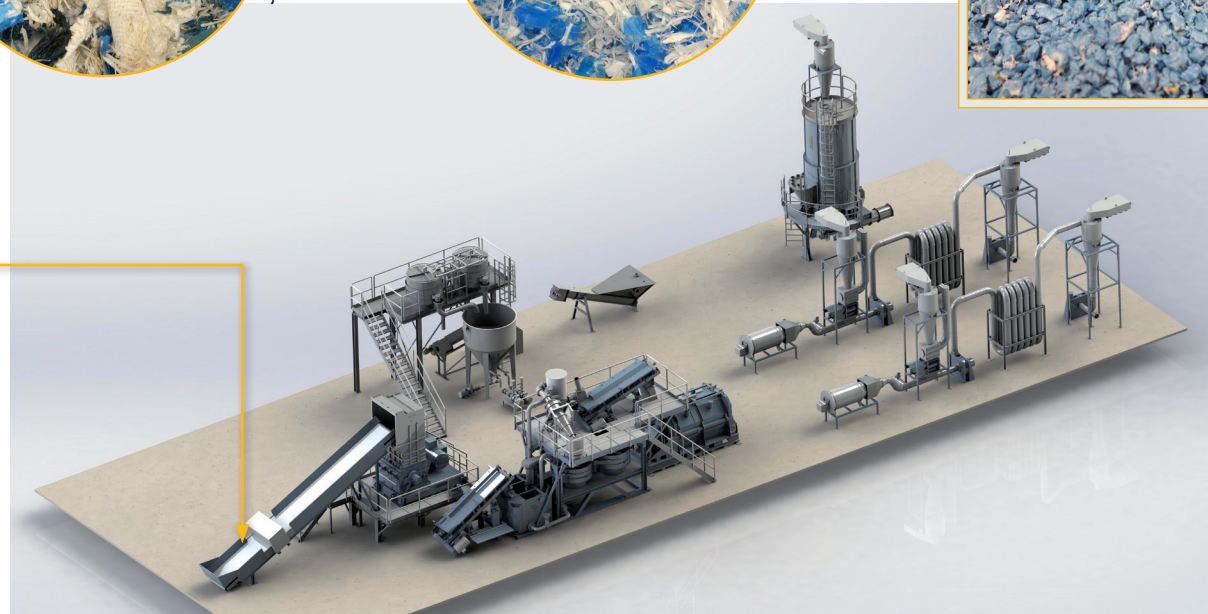

Size reduced and pre-washed in Granulator and Friction washer

Separated, washed and dried

Optionally: Agglomeration, for increasing the bulk density

Technical data:

| | |
|------------------|---|
| Input capacity: | approx. 0,5 – 1,0 t/h |
| Installed power: | approx. 350 – 450 kW (approx. 70% consumption) |
| Dimensions: | up to approx. 40 x 15 x 5,5 m |
| Water amount: | approx. 20 – 25 m ³ /h water in circulation approx. 1,0 m ³ /h fresh water consumption |

Item-No.: 0071037310
